

ENVIRONMENTAL POLICY

TARGOR-TRUCK has been operating on the Polish transport and forwarding market since the beginning of the 70s.

The dynamically developing company is constantly expanding the range of services offered, which are mainly: domestic and international transport and forwarding, authorised service centres, sales of spare parts and accessories for motor vehicles, technical tests and analyses of all types of vehicles, petrol station, customs service, and warehouse and logistic services.

WHEN CONDUCTING OUR BUSINESS, WE WANT TO BE PERCEIVED AS AN ENVIRONMENTALLY-FRIENDLY COMPANY

TARGOR-TRUCK provides services of the highest quality, meeting the requirements and expectations of customers, while minimising its negative impact on the environment.

Continuous improvement and promotion of pro-ecological policy is a determinant of the company's development direction for the nearest future.

The above goals are accomplished by:

- cooperation with suppliers with a sufficiently high level of quality and meeting the relevant environmental requirements;
- observance of legal and other requirements related to the conducted activity, including environmental protection requirements;
- developing, through training and internal communication, the level of awareness of managers, employees, subcontractors and suppliers in order to promote environmentally friendly practices and behaviour;
- identification of environmental aspects and prevention of pollution.

The Board and employees of TARGOR-TRUCK undertake to comply with the principles of the Environmental Policy and the principles of the Integrated Management System, as well as to improve it continuously in accordance with the requirements of ISO 14001:2015.

This Policy has been communicated by the President of the Management Board and is available to all employees as well as customers, suppliers and other interested parties.
